RE: POS Transition Plan & Windows End of Life

Dear Franchisees,

Please see the following statement from the Sangster's IT Department in regard to the POS System updates and transition plan.

We are in the process of finalizing the selection of our upcoming POS System. There is a large enough window to have new systems operational before Windows 7 end of life and ask that all stores and Managers be patient with us in doing so. We have discussed the end of life date with Smart Vendor and they have assured us that they will be no disruptions to the software prior to this date. As the IT team, it is our duty to ensure the smooth running of systems on the store level and have the best interest of the stores at mind. Thank you.

If you have any questions or concerns please reach out to support@sangsters.com

Best regards,

Arran Balint
