

A ***RAIN CHEQUE*** should be given to a customer if you have been promoting a certain item and you have run out of it.

A rain cheque should be filled in with the:

- product name
- price at which they are allowed to buy it
- date that you gave it
- store location
- expiry date should be marked as to when it will expire
- signature of the person authorizing it.

When rain cheques are returned to the store take it from the customer and allow him/her to purchase the specified product at the rain cheque price. At day end you will staple that used rain cheque to your daily sales report so it is not used again. Expiry dates on rain cheques are written as month, day and year issued. Make the expiry date 1-3 months from date issued.
