

PROVEN PLANT-POWERED NUTRITION!

It's a fact that a healthy diet – rich in vegetables, fruits herbs, and superfoods – is a pillar of robust, glowing health. But, let's be honest – who is getting everything they need all the time?

Even if someone is meeting the recommended daily intake, they aren't getting all the nutrients that their body needs to function at its best. **Why?**

- **JUST FOUR FOODS** make up the "bulk" (2/3) of North American phytonutrient intake: tomato, orange, carrot and strawberry. Variety is missing!
- It's harder to get the nutrients we need from our food because of changes to agriculture have rendered our food less nutritious

Phytonutrients are the plant nutrients that are mainly concentrated in the skin of fruits and veggies and are responsible for their colour, smell and flavour. But they do much more than that, phytonutrients are little powerhouses that are critically important to our health. Phytonutrients are critically important to our health for an array of functions.

IF THERE IS ONLY ONE THING YOU DO TO IMPROVE YOUR HEALTH, GETTING MORE PHYTONUTRIENTS IS IT! THAT'S WHY THERE IS greens+!

Not any green food will do – it takes expertise in nutrition and formulation to get the **PERFECT BALANCE** of plant nutrients from fruits, vegetables and botanical extracts found in **greens+**.

HOW CAN THE **PLANT POWER** OF greens+ **IMPROVE YOUR LIFE?**

INCREASE ENERGY AND VITALITY
